Morley-IAS by Honeywell reveals the most powerful product in the range

plus the latest updates in multi protocol system solutions

MORLEY 🔥 **IAS**

FIRE SYSTEMS

by Honeywell

ZX5Se

We are excited to announce the release of the **NEW!** ZX5Se control panel, the latest addition to our improved and ever expanding range of products.

The ZX5Se control panel is flexible yet simple to use, retaining the same family feel and quality as the established ZX range. The larger power supply and greater loop capacity allow system designs to be more cost-effective. The compatibility with device manufacturers' recently introduced products enables the user to take advantage of developments in detection and alarm technology. As we continue to support our customers closely, the ZX5Se will help you provide a simple, low-risk and cost-effective fire systems to meet your clients' needs.

We are confident that your business will benefit from this new product and look forward to announcing further additions to our unparalleled range of open protocol system solutions in the near future.

new features

- Larger display for more detailed event information
    - o   Improved fault finding
    - o   Evacuation countdown timer
- Higher output power supply
    - o   Provides greater loop and total load capability
- Greater flexibility to achieve DDA and standards compliance
    - o   Redesigned and improved loop cards supply 460mA output
    - o   Compatibility with Apollo loop driven sounders and beacons
    - o   Compatibility with Hochiki loop driven sounders and beacons
    - o   Compatibility with System Sensors loop driven sounders and beacons
- New Loop and battery calculator
    - o   Easy to use with improved accuracy
    - o   Ensures system design is within specifications before installation

Morley-IAS multi-protocol system solutions

- Visualeyez Graphical Alarm Management System
  - Enhanced speed of response to network events
  - New cost-effective multiple workstation editions
- Expression Public Address and Voice Alarm System
  - Complete solutions for all your PAVA needs
- Loop and Battery Calculator
  - New version is easier to use and improves accuracy
  - Prove design feasibility before installation
  - Compatible with all analogue addressable products
- ZX Networkable Analogue Addressable Control Panels
  - ZX5Se suitable for systems with higher output requirements
  - Increased loop power allows design flexibility
  - Compatible with full range of loop-powered output devices from Apollo, Hochiki and System Sensor
- Dimension Standalone Analogue Addressable Control Panels
  - Display simplified to provide fast, accurate information to the user
  - Event history now downloadable
- Horizon Non-Addressable Control Panels
  - Now includes optional sounder and relay expansion modules
