WIRELESS FIRE ALARM SYSTEM
RANGE 1 - 5 KM.

99 ZONE ALARM

FEATURES:

▶ The detectors can automatically match codes with alarm host. It's simple and fast.

▶ 1-99 independent wireless zones can be armed or disarmed independently.
Common zone and emergency zone can be defined at will.

▶ Two groups of timer-open /close-timer can be set ,and it also indicate the current status.

▶ Three kinds of alarm sound and four levels of alarm volumes are optional.

▶ 10 pieces of latest alarm massages can be scroll display simultaneously.

▶ 60 pieces of latest alarm messages can be inquired.

▶ A group of normal open, a group of normal close and + 12V DC outputs are provided to control
other devices (e.g., startup alarm siren, alarm light, alarm linkage etc.)

▶ Rechargeable backup Battery (12V1.2Ah)

999 ZONE ALARM
FEATURES:

▶ It has 1-999 independent wireless zones. Each can be armed or disarmed independently.
It also can be defined to common zone and emergency zone independently.

▶ The code of detector or wireless emitter can be learned to alarm host automatically or trigger by hand.

▶ Super- large LED display and voice guide make alarm more humanly and easily.

▶ Two access codes (installer code and user code) manage separately, and the code is
modifiable to prevent program from distorting at ill will.

▶ The alarm host has two timers. It can recognize on/off state automatically, and also
indicates present (on/off) state.

▶ Five pieces of up-to date alarm message can be scroll to display simultaneously.

▶ Inquiring 100 pieces of up-to-date records (including alarm message and indicate message)

▶ A normal open/close output and +12V DC output are provided to control other devices
(e.g. startup alarm siren, alarm light, alarm linkage etc.)

▶ Provide a set of audio signal output, which can connect directly with 8Ω15W passive trumpet
and active sound box, and build-in trumpet loses affection automatically.(optional)

▶ Micro printer can print 5 pieces of alarm records simultaneously, and also can print them
one by one.(optional)

▶ Manage center online can be connected with computer by RS232 interface and ready to display and
manage the alarm message.

▶ The internal or external backup battery are optional. There is protection for over-charged or
over-discharged and also low power alert.

▶ Rechargeable backup battery (12V 7Ah) is optional.

▶ Dial module is optional.

▶ Print module is optional.

▶ Real Time Module is optional.

EMITTER

FEATURES:

- ▶ It adopts 8-bit single-chip as processing core and provides a group of wired alarm input.
- ▶ A group of audio alarm inputting and +12V DC output
- ▶ It can transmit alarm signal of 315 MHz to wireless detector
- ▶ It has long wireless emit distance (1-5 km in open area)
- ▶ It can be armed or disarmed independently by wireless remote controller and has emergency alarm function.

WIRELESS DETECTOR

FEATURES:

- ▷ Standby current: $10\mu A$
- ▷ Alarm current: $30\mu A$
- ▷ Temperature range: -10 - 50oC
- ▷ Alarm density: 0.65 - 1.55%FT
- ▷ Alarm volume: 85dB in 3-meter distance

KEY FOB

FEATURES:

  It can arm/disarm alarm host and make emergency alarm
  It adopts resonance when emit signal, so it is very stable
